Dear Hiring Manager,

SUB: Artificial Intelligence with Green Technology Internship

I am excited to apply for the Python intern role at Talk Wisely. As a recent graduate with hands-on experience in Django, Python, and backend web development, I bring a strong foundation in software development and a passion for solving complex problems in the IT domain.

During my six-month internship at Spectrics Solutions, I honed my backend development skills by working on real-world projects, including creating efficient and scalable systems using Django and SQLite. Additionally, I've led two projects:

1. **India Verse** – An e-commerce website connecting local manufacturers with consumers.
2. **Farma Helper** – A platform designed for agricultural product transactions, built with Django, Python, HTML, and CSS.

These experiences have equipped me with a deep understanding of end-to-end web development, database management, and cross-functional collaboration. My participation in NCC has further instilled in me qualities of discipline, leadership, and a commitment to excellence.

I am eager to contribute my technical skills and fresh perspective to your team, while also embracing opportunities to grow and evolve professionally.

I would welcome the chance to discuss how my technical expertise and enthusiasm align with your goals. Thank you for considering my application. I look forward to the opportunity to contribute to Talk Wisely's success.

Yours sincerely,

Rishabh Leuva
